WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

TRANQUIL TROPICAL TREASURES

Cultivating a thriving aquascape full of marine flora and fauna is an endless source of joy! You can spend hours creating and curating a miniature water world where life is allowed to slow down a little. A tropical aquarium can transform a small corner of your living space into a unique, meditative display. No matter how much you research, prepare and care for your aquarium, it never ceases to inspire you. Ready to dive in and learn more? Let's take you through this LEGO® underwater paradise where you can explore the beauty, serenity – and surprises – in a creative environment!

DE PAISIBLES TRÉSORS TROPICAUX

S'occuper d'un paysage aquatique florissant qui combine faune et flore marines est une source de joie infinie! Vous pouvez passer des heures à créer et organiser un monde aquatique miniature où la vie peut ralentir un peu. Un aquarium tropical peut transformer un petit coin de votre espace de vie en une exposition méditative unique. Même si vous passez des heures à effectuer des recherches, à préparer votre aquarium et à l'entretenir, il ne cessera jamais de vous inspirer. Prêt à plonger pour en savoir plus? Découvrons ce paradis sous-marin LEGO® , source de beauté, de sérénité – et de surprises – dans un environnement créatif!

TESOROS TROPICALES LLENOS DE CALMA

¡Cultivar un próspero paisaje acuático lleno de flora y fauna del mar es una fuente inagotable de alegría! Puedes pasarte horas creando y perfeccionando un mini mundo oceánico donde la vida se vuelve un poco más lenta. Un acuario tropical puede transformar un pequeño rincón de tu espacio vital en una singular exhibición que invita a meditar. Por mucho que investigues, arregles y cuides de tu acuario, este nunca dejará de inspirarte. ¿Estás listo para sumergirte y enterarte de todos los detalles? Te llevaremos a recorrer este paraíso submarino LEGO® donde podrás explorar la belleza y la serenidad (sin olvidarnos de las sorpresas), ¡en un entorno totalmente creativo!

CAREFREE LEGO® CREATURES

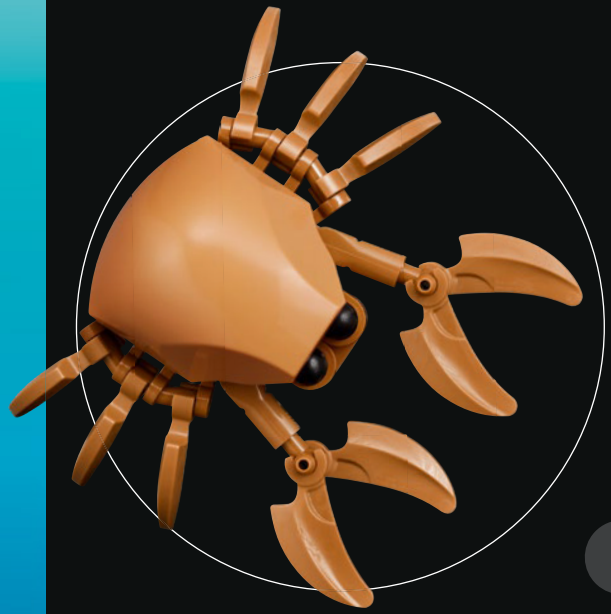

Welcome to the world of LEGO® tropical fish. From colorful personalities to swaying movements, you will meet a tank full of creative creatures, each with their own charming character. You may recognize some of them from a snorkeling trip – but, of course, we couldn't resist adding a splash of imagination!

DES CRÉATURES LEGO® INSOUCIANTES

Bienvenue dans le monde des poissons tropicaux LEGO®. Des personnalités hautes en couleur aux mouvements ondoyants, vous allez découvrir un aquarium rempli de créatures originales qui ont toutes leur propre charme. Vous en reconnaîtrez peut-être certaines que vous avez déjà croisées lors d'une plongée en apnée, mais nous n'avons évidemment pas pu résister à l'envie d'ajouter une touche d'imagination!

CRIATURAS LEGO® QUE NO SE PREOCUPAN POR NADA

Te damos la bienvenida al mundo de los peces tropicales LEGO®. Desde personalidades coloridas hasta movimientos ondulantes, conocerás una pecera llena de creativas criaturas, cada una con un encantador carácter propio. Quizá reconozcas a algunas que hayas visto al bucear con esnórquel en tus vacaciones. Pero, naturalmente, ¡no pudimos resistirnos a darles una salpicada de imaginación a nuestras versiones!

SEA CRAB

Crabs date all the way back to the Jurassic period. The smallest known species are less than 0.35 in. (1 cm) long, whereas the largest, the Japanese spider crab, can measure up to 12.1 ft. (3.7 m) between its claws!

LE CRABE DE MER

Les crabes existent depuis la période jurassique. Les plus petites espèces connues mesurent moins de 1 cm (35 po) de long, tandis que la plus grande, l'araignée de mer japonaise, peut mesurer jusqu'à 3,7 m (12,1 pi) d'une pince à l'autre!

CANGREJO DE MAR

Los cangrejos datan del período jurásico. Las especies más pequeñas conocidas tienen una longitud de menos de 1 cm, mientras que la más grande, el cangrejo gigante japonés, ¡puede alcanzar una distancia de hasta 3,7 m entre las puntas de sus tenazas!

STRIPED BRICKFISH

Similar to how rockfish have evolved to disguise themselves as stones, the striped brickfish looks curiously like it is made of LEGO elements! This incredibly rare fish is native only in the imaginations of LEGO Designers and now exclusively found in your LEGO Icons Tropical Aquarium.

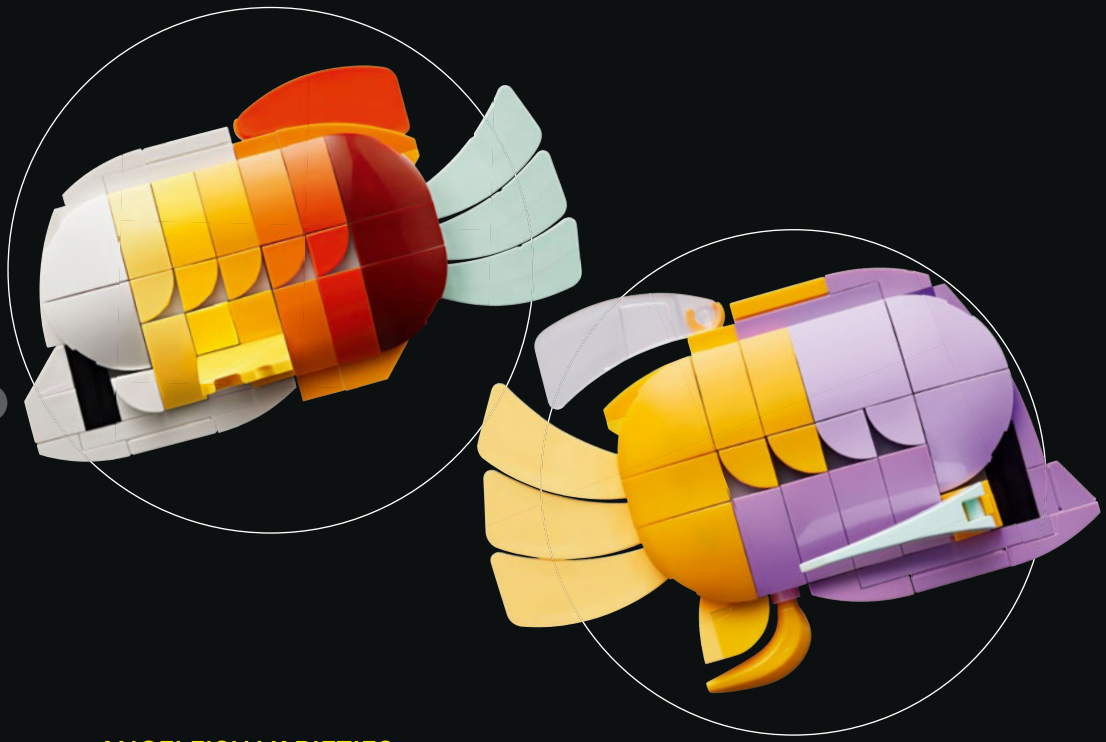

LE POISSON-BRIQUE RAYÉ

Tout comme les rascasses, qui ont évolué et se camouflent désormais en imitant les pierres, le poisson-brique rayé donne l'impression d'avoir été réalisé à partir d'éléments LEGO! Ce poisson incroyablement rare est sorti tout droit de l'imagination des concepteurs LEGO, et vous le trouverez désormais exclusivement dans L'aquarium tropical LEGO Icons.

PEZ BRICK RAYADO

Así como el pez piedra ha evolucionado para parecer una roca, ¡el pez brick rayado parece curiosamente hecho de elementos LEGO! Este pez increíblemente raro es nativo de las aguas de la imaginación de los diseñadores de LEGO, y ahora solo habita tu Acuario Tropical LEGO Icons.

ANGELFISH VARIETIES

The Pomacanthidae family represents over 80 different species, angelfish among them. They're a fascinating and familiar sight in coral reef ecosystems and look almost ethereal as they twirl through the water. The colors and sizes of angelfish are quite varied. Young angelfish also can look very different from how they do as adults, as their stripes and markings change as they grow.

DES VARIÉTÉS DE POISSONS-ANGES

La famille des Pomacanthidae constitue une famille de plus de 80 espèces différentes, dont les poissons-anges. Créant un spectacle fascinant et familier dans les écosystèmes des récifs coralliens, ils semblent presque éthérés lorsqu'ils virevoltent dans l'eau. Les poissons-anges sont de couleurs et de tailles variées. L'apparence des jeunes poissons-anges peut également varier considérablement à l'âge adulte, leurs rayures et leurs motifs évoluant au fur et à mesure de leur croissance.

VARIEDADES DE PEZ ÁNGEL

La familia Pomacanthidae abarca más de 80 especies diferentes, entre ellas el pez ángel. Comúnmente vistos en los arrecifes de coral, los ejemplares de esta especie presentan un espectáculo fascinante y casi sobrenatural al danzar en el agua. Los colores y tamaños de los peces ángel son muy variados. Los especímenes jóvenes también pueden tener un aspecto muy diferente al de los adultos, ya que sus rayas y marcas cambian a medida que crecen.

RAINBOWFISH

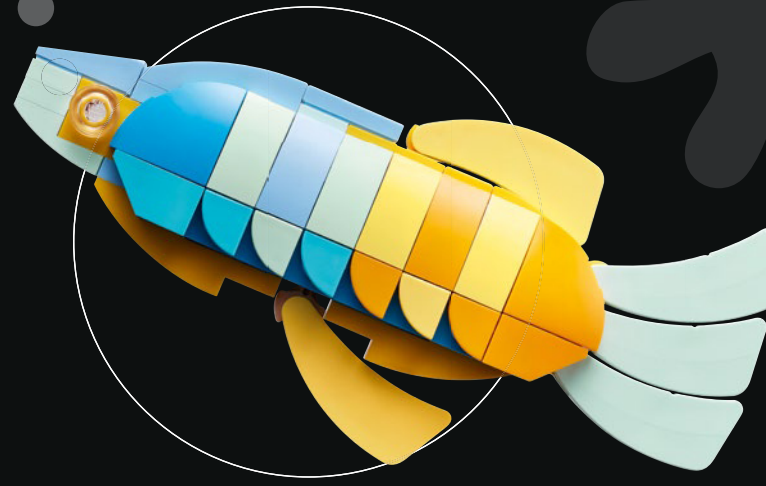

We were inspired by how well rainbowfish colors match LEGO colors. Most rainbowfish are found in freshwater, a few in brackish waters and estuaries, while others have adapted to saltwater aquariums. This one here has evolved to live in open air!

LE POISSON ARC-EN-CIEL

Nous avons été inspirés par la ressemblance des couleurs des poissons arc-en-ciel et des éléments LEGO. La plupart des poissons arc-en-ciel vivent en eau douce, quelques-uns dans les eaux saumâtres et les estuaires, et d'autres se sont adaptés aux aquariums d'eau salée. Celui-ci a évolué et vit maintenant en plein air!

PEZ ARCOÍRIS

Nos inspiramos en el hecho de que los colores de los peces arcoíris son muy parecidos a los de los bricks LEGO. La mayoría de los peces arcoíris viven en agua dulce, unos pocos en aguas salobres y estuarios, y otros más se han adaptado a los acuarios de agua salada. ¡Pero este de aquí ha evolucionado para vivir expuesto al aire!

MESMERIZING CORALS

A coral reef consists of a plethora of symbiotic creatures. Swaying gently with the current, corals contribute to the diverse circle of life under the sea. Some in your aquarium are inspired by real life, others are only grown in this LEGO® model.

DES CORAUX FASCINANTS

Un récif corallien se compose d'une pléthore de créatures symbiotiques. Se balançant doucement au gré du courant, les coraux contribuent à l'équilibre riche et diversifié de la vie sous-marine. Certains coraux de votre aquarium s'inspirent de vrais coraux, tandis que d'autres ne poussent que sur ce modèle LEGO®.

CORALES HIPNOTIZANTES

Un arrecife de coral se compone de una plétora de criaturas en simbiosis. Meciéndose suavemente con la corriente, los corales contribuyen al diverso círculo de la vida bajo el mar. Algunos corales de tu acuario están inspirados en la vida real, ¡y otros solo crecen en este modelo LEGO®!

NEW LEGO SPECIES

Marine biologists discover new oceanic species on a regular basis. Your LEGO aquarium is home to intriguing new coral variations for you to discover and name!

NOUVELLES ESPÈCES LEGO

Les biologistes de la vie marine découvrent régulièrement de nouvelles espèces océaniques. Votre aquarium LEGO abrite de nouvelles variétés de coraux fascinantes que vous pouvez découvrir et nommer!

NUEVAS ESPECIES LEGO

Los biólogos marinos descubren nuevas especies oceánicas casi todo el tiempo. Tu acuario LEGO alberga nuevas e intrigantes variantes de corales, ¡para que las descubras y les pongas nombre!

BRAIN CORAL

A core staple of a healthy reef, this slow-growing coral can grow up to 59-66.5 in. (150-170 cm) tall. Some specimens live up to 900 years!

LE CORAIL CERVEAU

Ce corail à croissance lente, qui constitue un aliment de base d'un récif sain, peut mesurer jusqu'à 150, voire 170 cm (59 à 66,5 po). Certains spécimens vivent jusqu'à 900 ans!

CORAL CEREBRO

Un elemento básico de un arrecife sano, este coral de crecimiento lento puede crecer hasta una altura de 150-170 cm. ¡Algunos ejemplares viven hasta 900 años!

GARDEN EELS

These are typically found in burrows on the sea floor. Usually, they only poke out just enough to catch drifting food from the current.

L'ANGUILLE JARDINIÈRE

Elle vit principalement dans des terriers sur les fonds marins. En général, elle ne sort que pour attraper la nourriture qui dérive avec le courant marin.

ANGUILAS JARDINERAS

Suelen vivir en madrigueras en el fondo marino. Se asoman solo lo suficiente para atrapar la comida arrastrada por la corriente.

SEAWEED

Seaweed may resemble land plants, but it's structurally different. The leaf-like parts are 'blades', the stem-like parts are 'stipes' and the root-like anchors are 'holdfasts'.

LES ALGUES MARINES

Les algues marines ressemblent un peu à des plantes terrestres, mais leur structure diffère. Les parties en forme de feuilles sont des « lames », les parties en forme de tige sont des « stipes » et les ancres en forme de racine sont des « crampons ».

MACROALGAS

Las macroalgas se parecen a las plantas terrestres, pero tienen una estructura diferente. Las partes semejantes a hojas se llaman *láminas*, las que parecen tallos son los *estípites* y las que sujetan cada ejemplar al suelo marino son los *discos de fijación*.

PURPLE CORKSCREW ANEMONE

Did you know corkscrew anemones can sting intruders or cover themselves completely with sand if threatened? (This one is quite safe!)

L'ANÉMONE TIRE-BOUCHON VIOLETTE

Saviez-vous que l'anémone tire-bouchon peut piquer les intrus ou se couvrir complètement de sable si elle se sent en danger? (Celle-ci est en sécurité!)

ANÉMONA MORADA

¿Sabías que las anémonas pueden picar a los intrusos o cubrirse completamente de arena si se sienten amenazadas? (¡Esta es bastante segura!).

BUBBLE-TIP ANEMONE

These organisms absorb nutrients by filtering particles with their tentacles or consuming debris produced by fish dwelling in their habitat.

L'ANÉMONE BULLE

Ces organismes absorbent les nutriments en filtrant les particules avec leurs tentacules ou en consommant les débris produits par les poissons qui vivent dans leur habitat.

ANÉMONA BURBUJA

Estos organismos absorben nutrientes filtrando partículas con sus tentáculos o consumiendo los desechos producidos por los peces con los que comparten hábitat.

MARINE ALGAE

'Marine algae' refers to various types of ocean-growing algae. They are believed to produce around half of the Earth's oxygen through photosynthesis!

LES ALGUES DE MER

Les « algues de mer » désignent divers types de grandes algues océaniques. On estime qu'elles produisent environ la moitié de l'oxygène de la Terre grâce à la photosynthèse!

ALGAS MARINAS

El término *algas marinas* abarca distintos tipos de organismos similares a plantas que crecen en el océano. ¡Se cree que producen alrededor de la mitad del oxígeno de la Tierra mediante fotosíntesis!

A CREATIVE SPIN

Hidden levers add an extra few elements of surprise. With the creative use of joints, axles and engineering magic, you can make parts move like real sea creatures. Using turntables positioned at distances that form Pythagorean triples (go, math!), we recreated organic shapes, movements and natural aesthetics.

UNE VERSION CRÉATIVE

Des leviers cachés ajoutent des éléments de surprise supplémentaires. L'utilisation créative d'articulations et d'axes, ainsi que la magie de l'ingénierie, vous permettent de faire bouger les pièces comme s'il s'agissait de véritables créatures marines. En espaçant plusieurs plaques tournantes de manière à ce qu'elles forment un triplet pythagoricien (vive les maths!), nous avons pu recréer des formes organiques, des mouvements et une esthétique naturelle.

UN GIRO CREATIVO

Hay palancas ocultas que desencadenan algunas sorpresas. Con el uso creativo de articulaciones, ejes y un poco de magia (del tipo que algunos llaman "ingeniería"), puedes hacer que las piezas se muevan como las criaturas marinas de verdad. Usando plataformas giratorias colocadas a distancias que forman ternas pitagóricas (¡arriba las matemáticas!), logramos recrear la estética natural con formas y movimientos orgánicos.

MOVE THE CRAB

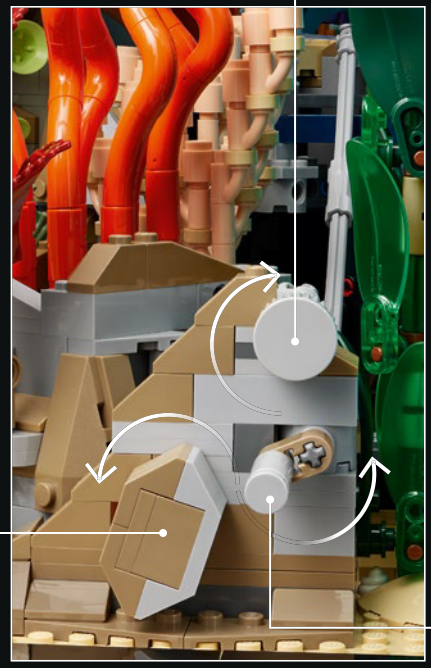

Turn the 'stone' element and make the crab crawl out of its cave.

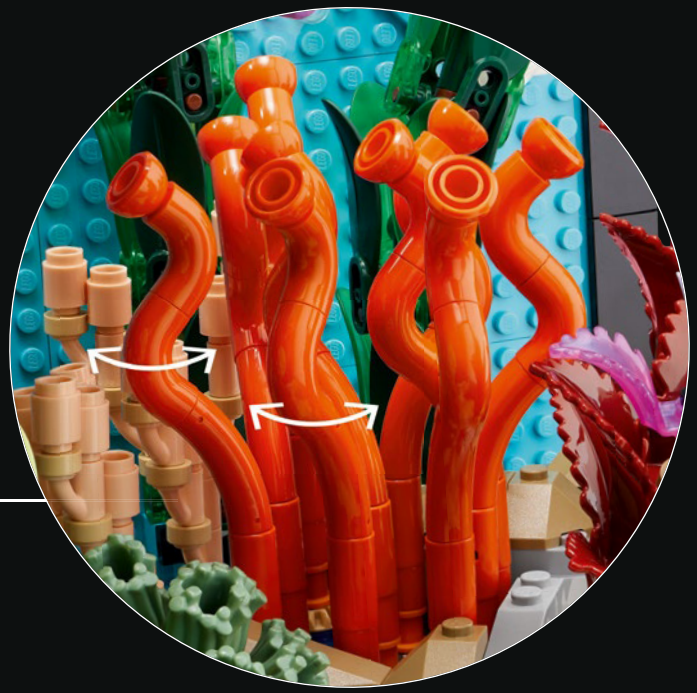

FAITES BOUGER LE CRABE

Tournez l'élément « pierre » pour faire sortir le crabe de sa grotte.

HAZ SALIR AL CANGREJO

Si giras el elemento que representa una piedra, el cangrejo se arrastrará hacia afuera de su cueva.

SWIRL THE CORALS

Rotate the gray knob to make the sea anemones swirl.

FAITES TOURBILLONNER LES CORAUX

Tournez le bouton gris pour faire tourbillonner les anémones de mer.

PON A GIRAR LOS CORALES

Gira la perilla gris para que giren las anémonas.

OPEN THE TREASURE CHEST

Turn the crank behind the treasure chest to make the lid open and close.

OUVREZ LE COFFRE AU TRÉSOR

Tournez la manivelle située derrière le coffre au trésor pour ouvrir et fermer le couvercle.

ABRE EL COFRE DEL TESORO

Gira la palanca de detrás del cofre del tesoro para hacer que la tapa se abra y se cierre.

ANIMATE THE FISH

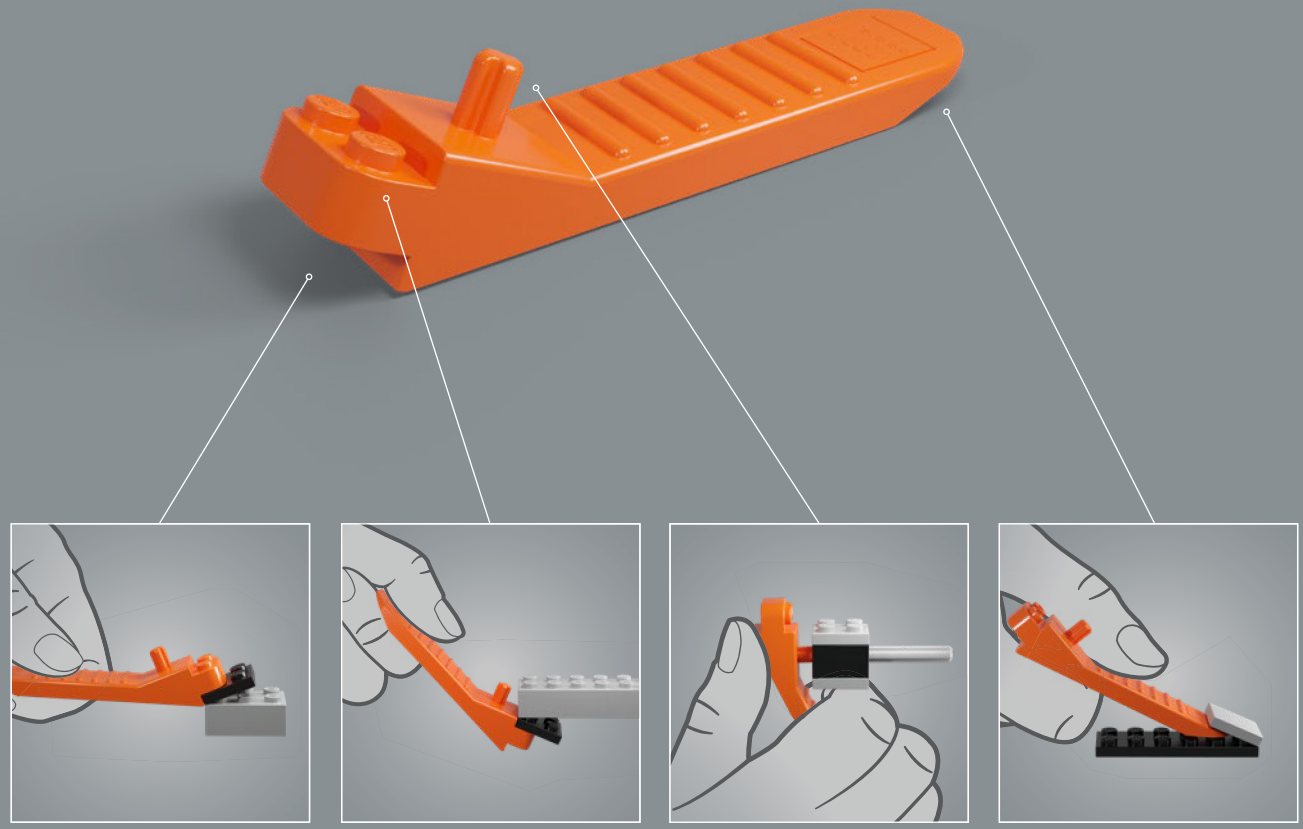

Turn the crank on the side of the model and the rare striped brickfish will wiggle and 'swim.'

ANIMEZ LES POISSONS

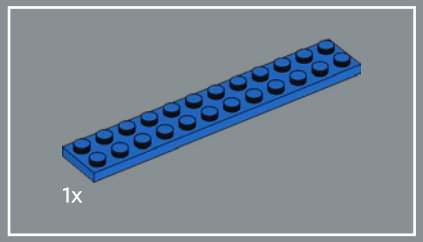

Tournez la manivelle sur le côté du modèle pour faire « nager » et « se tortiller » le rare poisson-brique rayé.

ANIMA A LOS PECES

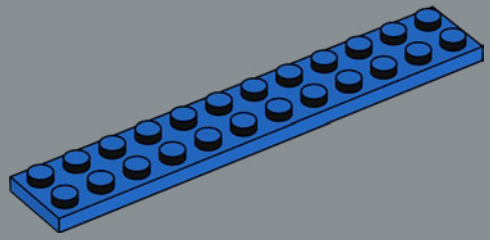

Si giras la palanca lateral del modelo, el rarísimo pez brick rayado se moverá y "nadará".

A CLEAN SWEEP

LEGO® mop and broom elements are used throughout the set – like in these aqua/light-blue coral structures.

UN BALAYAGE PROPRE

Des éléments de vadrouille et de balai LEGO® sont utilisés sur tout l'ensemble, notamment dans les structures coralliennes bleu turquoise et bleu clair.

UNA LIMPIEZA A PROFUNDIDAD

Hay elementos LEGO® que representan escobas y trapeadores por todo el set. En este coral, se aprecian en color turquesa.

HATS OFF

Five different types of LEGO hats and headgear elements are used to recreate life-like corals. The brain coral uses purple LEGO minifigure chef's hats, and the light-green coral is built with pith helmets!

CHAPEAUX

Cinq types de chapeaux et éléments de couvre-chef LEGO sont utilisés pour recréer des coraux très réalistes. Le corail cerveau utilise des toques de chef violettes de figurines LEGO, et le corail vert clair est réalisé avec des casques coloniaux!

NOS QUITAMOS EL SOMBRERO

Se usan cinco tipos diferentes de sombreros y cascos LEGO para recrear corales que parecen de verdad. La superficie del coral cerebro se compone de gorros de cocinero para minifiguras LEGO morados, ¡y el coral verde claro está hecho de cascos de safari!

DISCOVER AS YOU BUILD

One of the special features of a LEGO aquarium is that not everything is what it seems. If you look closer, you'll find that, when combined in new ways or colors, LEGO elements can be used to create surprising new structures that look nothing like their original design! Look out for these details as you build.

DÉCOUVREZ TOUT EN CONSTRUISANT

L'une des particularités d'un aquarium LEGO est que les choses ne sont pas forcément telles qu'elles semblent être. Si vous y regardez de près, vous constaterez que lorsque les éléments LEGO sont combinés différemment ou utilisent d'autres couleurs, ils permettent de créer de nouvelles structures surprenantes complètement différentes de celles d'origine! Prêtez attention à ces détails lorsque vous construisez.

DESCUBRE MIENTRAS CONSTRUYES

Una de las particularidades de un acuario LEGO es que no todo es lo que parece. Mira bien para descubrir que, recoloreados o combinados de nuevas formas, los elementos LEGO permiten crear nuevas y sorprendentes estructuras, ¡que no se parecen en nada a sus diseños originales! A medida que construyas, presta atención a estos detalles.

AN OLD TUSK

The anemone tentacles were originally designed as LEGO elephant tusks!

UNE HISTOIRE DE DÉFENSE

À l'origine, les tentacules de l'anémone avaient été conçus pour créer des défenses d'éléphant LEGO!

BRAZOS QUE SE EXTIENDEN EN EL TIEMPO

¡Los tentáculos de la anémona se diseñaron originalmente como colmillos de elefante LEGO!

NINJA-POWERED CORALS?

The light-yellow coral element originated as a magical power element in LEGO NINJAGO® sets.

DES CORAUX PROPULSÉS PAR DES NINJAS?

L'élément de corail jaune clair était, à l'origine, un élément de pouvoir magique dans les ensembles LEGO NINJAGO®.

¿CORALES CON PODERES NINJA?

El elemento que da forma al coral amarillo claro solía representar un poder mágico en los sets LEGO NINJAGO®.

A SOFT SHELL?

The elements used for the tiny shells are repurposed LEGO cupcake tops.

UNE COQUILLE MOLLE?

Les éléments utilisés pour représenter les minuscules coquillages étaient, à l'origine, des dessus de cupcakes LEGO.

¿CONCHA? ¿HABLAS DEL PAN?

Los elementos usados para las pequeñas conchas son tapas de pastelitos LEGO reutilizadas.

LEAVE A LIGHT ON

The element housing the purple corkscrew anemone was originally designed to be part of a desk lamp!

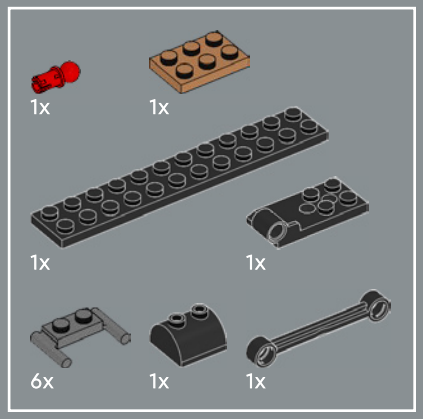

LAISSEZ UNE LUMIÈRE ALLUMÉE

L'élément abritant l'anémone tire-bouchon violette faisait initialement partie d'une lampe de bureau!

DEJA LA LUZ ENCENDIDA

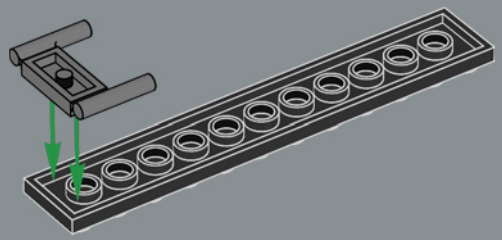

El elemento que alberga a la anémona morada se diseñó originalmente para formar parte de una lámpara de escritorio.

Finding a pattern for the aquarium's backdrop was surprisingly challenging, as it needed to feel both very organic but also use a limited number of pieces, so it's always easy to find the parts you need.

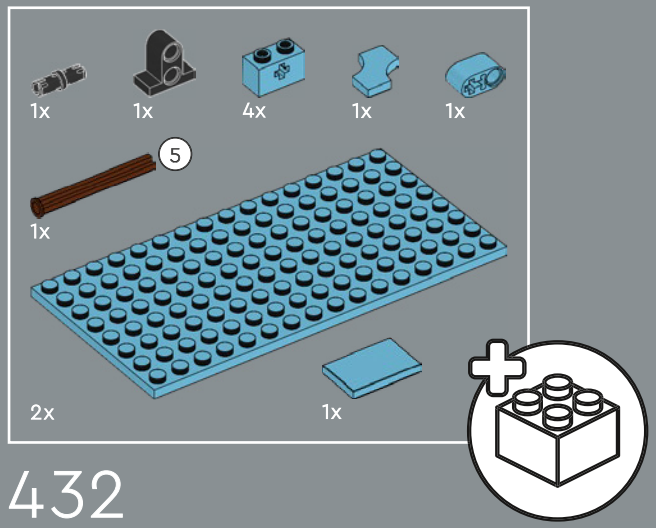

Aussi étonnant que cela puisse paraître, il a été difficile de trouver un motif pour le fond de l'aquarium, car celui-ci devait à la fois être très organique et utiliser un nombre limité de pièces, pour que vous trouviez toujours facilement les pièces dont vous avez besoin.

Encontrar un patrón para el telón de fondo del acuario fue un sorprendente desafío porque, además de parecer muy orgánico, debía constar de un número limitado de piezas para que siempre fuera fácil encontrar la que necesitas.

Throughout the LEGO® Icons Tropical Aquarium, we intermittently used translucent and opaque leaf elements to control light refraction and create the effect of flowing seaweed.

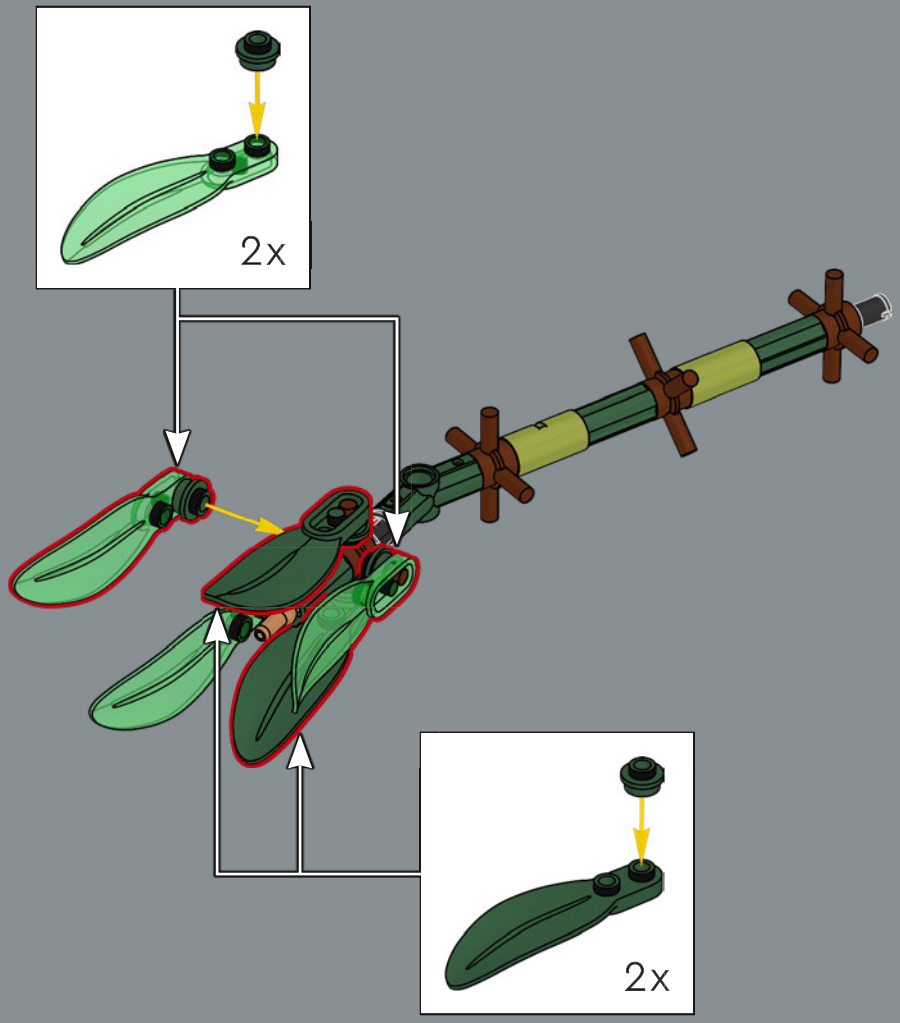

Dans l'ensemble de L'aquarium tropical LEGO® Icons, nous avons utilisé par intermittence des éléments foliaires translucides et opaques pour contrôler la réfraction de la lumière et donner l'impression que des algues coulent.

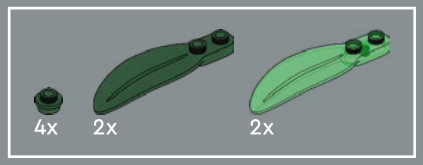

Por todo el Acuario Tropical LEGO® Icons hay "hojas" traslúcidas y opacas intercaladas para controlar la refracción de la luz y crear un efecto visual de movimiento de las macroalgas a merced de la corriente.

When you use a drive mechanism via levers and linkages rather than gear chains, it helps transfer as much mechanical power as possible and gives you more control over the final movement.

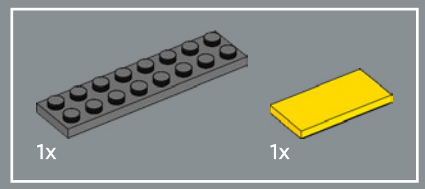

Le mécanisme d'entraînement utilisant des leviers et des liaisons plutôt que des chaînes d'engrenages permet de transférer un maximum de puissance mécanique et de mieux contrôler le mouvement final.

Usar un mecanismo de accionamiento mediante palancas y barras de conexión en vez de cadenas y engranes ayuda a transferir toda la potencia mecánica posible y te da más control sobre el movimiento final.

From the LEGO® Icons Design Team

We poured all the attention that a live tropical aquarium deserves into every inch of this model. While designing the aquarium, we wanted to re-imagine some organic shapes and play with energetic color gradients and translucency to create a kaleidoscope of vibrant coral, swaying anemones and life-like tropical fish. As an added touch of interaction, we added a bit of movement activated by disguised levers throughout the model. For the delicate fish fins, a brand-new element helped us achieve a flawless, fluttery look – which also happens to work perfectly as seaweed! We hope you have fun building and maybe experience some ocean tranquility in your home.

Un mot de l'équipe de conception LEGO® Icons

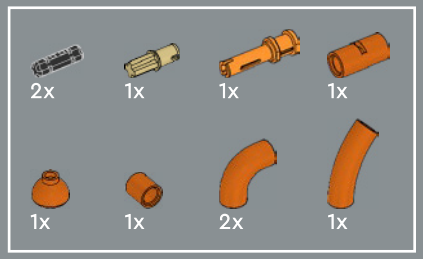

Nous avons consacré à chaque centimètre de ce modèle toute l'attention que mérite un véritable aquarium tropical. Lors de la conception de l'aquarium, nous voulions réinventer certaines formes organiques et jouer avec des dégradés de couleurs dynamiques et la translucidité pour créer un kaléidoscope de coraux lumineux, d'anémones qui se balancent et de poissons tropicaux réalistes. Pour rendre le tout plus interactif, nous avons ajouté un peu de mouvement activé par des leviers dissimulés à travers tout le modèle. Pour les délicates nageoires de poisson, un tout nouvel élément nous a permis d'obtenir un aspect impeccable et flottant, qui fait également office d'algue! Nous espérons que vous vous amuserez à construire et que vous ressentirez peut-être la tranquillité de l'océan chez vous.

Impresiones del equipo de diseño de LEGO® Icons

Dedicamos toda la atención que merece un acuario tropical con especies vivas a cada centímetro de este modelo. Al diseñar el acuario, quisimos reimaginar algunas formas orgánicas y jugar con contundentes gradientes de color y transparencias para crear un caleidoscopio de vibrantes corales, ondulantes anémonas y peces tropicales de apariencia real. Como toque de interacción adicional, agregamos un poco de movimiento activado por palancas ocultas por todo el modelo. Además, un elemento totalmente nuevo que nos ayudó a dar un aspecto dinámico a las aletas de los peces, ¡también funciona a la perfección como lámina para la macroalga! Esperamos que te diviertas construyendo e incluso puedas sentir un poco de la tranquilidad del océano en casa.

The movement of the bubble-tip anemone created by this mechanism was the LEGO® Icons Design Team's favorite in this set – it's simple yet always gets a laugh!

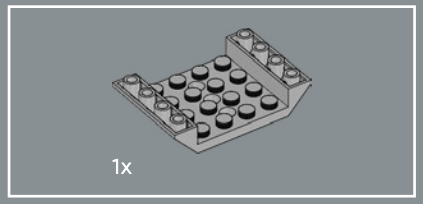

C'est le mouvement de l'anémone bulle créé par ce mécanisme qu'a préféré l'équipe de conception LEGO® Icons lors de la réalisation de cet ensemble. Il est simple, mais fait toujours rire!

El movimiento de la anémona burbuja creado por este mecanismo fue el favorito del equipo de diseño de LEGO® Icons a cargo de este set. A pesar de ser sencillo, ¡siempre inspira carcajadas!
